We are distributors of the

SONIC BLOOM

Growing system for Australia and New Zealand

Mind-Boggling Results

- Strawberry yields, individual results have had increases of **300%**.
- **1.5 Meter** alfalfa has been reported by users, with a **100% increase** in tonnage, 29% protein gives 30% increase in milk production.
- Over **182 meters** Purple Passion Plant (**Guinness World Record**).
- Sonic Bloom® doubled the Active ingredient in Ginseng.
- Apple yields increased **50%**
- Soybean harvest **doubled**.
- Hot peppers mature **30 days sooner** and produced twice as many peppers.
- Sonic Bloom apples had a **5-month** shelf life.
- The zinc content of apples increased **1750%**.
- Sonic Bloom matures tomato crop **35 days sooner** and nearly doubled yield.
- **4.8 meters** high corn with three or four ears per stalk.
- Accelerated growth of Black Walnut trees **300%**. They are ready for sale in 20 years instead of 50 years.
- Sonic Bloom® increased sugar levels.
- Sonic Bloom® increased grape yields by **100%** and sugars by two percentage points
- Sonic Bloom® increased the size of cranberries by **66%**.
- Normally sterile tomato plant "suckers" are potted and produced tomatoes faster than from seed.
- Blueberries were the **22 mm** in diameter and ripened **two weeks sooner**.
- Cucumber plants produced **three times** as many cucumbers.
- Sonic Bloom® **reduced irrigation** requirements up to **55%** in some cases.
- Sonic Bloom® tomatoes had a roadside, fruit stand, **and shelf life twice** as long as untreated plants.
- Produce buyers drove extra distances in order to buy Sonic Bloom produce because of its incredibly **delicious flavour**.
- Chrysanthemum **flowers doubled** in quantity and mature in 4 weeks.
- The use of Sonic Bloom® treated hay resulted in a **30% increase** in milk production.

Learn More About What Our Innovative Organic Growing System Can Do for YOUR Plants!

Easy, Affordable & Lightweight Addition

Every Type of Horticulture & Any Size Growing Space`

What can I expect when I use Sonic Bloom®?

- *Increased Yields with shorter harvest Water use reduction*
- *Drought Resistance*
- *Increased Resistance to Disease*
- *Increase in number of Blooms Extending Growing Season in Cold Climates*
- *Decrease and/or Remove Need for Pesticides*
- *Increase Shelf Life of fruits & veggies*
- *Increased results with every seed generation*

Discover the Secret Farmers & Gardeners Have Been Growing for Over 35 Years!

Sonic Bloom® will bring your plants and their growing space to life and increase your bounty & nutrition using proven scientific methods in one easy system.

On every leaf, there are thousands of such small openings. Each stoma--less than 1/1000 of an inch across--allows oxygen and water to pass out of the leaf, or transpire, while other gases, notably carbon dioxide, move in to be transformed by photosynthesis into sugars. During dry conditions, the stomata close to prevent a wilting plant from drying out completely. Photomicrographs show plant stomata opening wider to Carlson's frequencies, while a Philips 505 Scanning Electron Microscope shows substantially higher stomata density on a leaf treated with Sonic Bloom; additionally, the individual stomata are more developed and better defined.

Untreated Stoma

Treated with Sonic Bloom

[Products available](#)

Sonic Bloom® Home Gardener Collection - Including all 3 Sonic Bloom® CD's to Grow By, Classical, Whistling and Inspirational. The 12 Grams Organic Sonic Bloom® Nutrient, making 170 Litres of spray to last any small gardener up to 2 growing seasons.

Solar SB1 Sonic Bloom® Box -For Indoor & up to 5 Acres

Includes Solar SB1 Sonic Bloom® Box with Solar Panel, 24-hour timer for effortless use, wall plug, and battery power option along with 450 Grams of Sonic Bloom® Organic Plant Food to make 650 Litres. Sprays 5 Acres up to 5 times with a fine mist sprayer, plenty for one growing season.

[New and Improved](#)

LARGE FARM KIT - SOLAR SB3 COMMERCIAL SONIC BLOOM® BOX

For outdoor NOW up to 200 Acres ~2.2 KG of Sonic Bloom® Plant Food to make 900 gallons of Spray

The Solar Powered SB3 is the ultimate in Sonic Bloom® sound technology and sound frequency delivery. This Custom Made 9 speaker audio box radiates 360 degrees to treat up to 200 acres and includes a downward-facing speaker for soil stimulation, and weighs under 5 KG with a solar panel.

Volume control can easily be set for your growing needs & space. The SB3 is equipped with an on/off/volume switch and a 12-foot cable with a timer for a 12-volt battery option. Custom Solar Panel also included.

2-year Warranty included ~ 12-volt battery not included

Instructions & Schedules

The following are guidelines for using Sonic Bloom®

Do's & Don'ts

- Expose plants to sound, particularly in the Early Morning, when dew is present on the plants' leaves. This allows plants to absorb more natural moisture for the rest of their day.
- Use Fine Mist when spraying Sonic Bloom®, paint sprayers, foggers & spray bottles on mist setting.
- Always Water the leaves and plants and rinse well the day after you use Sonic Bloom® Spray
- If spraying outdoors, make sure that the air temperature is between 13 degrees and 32 degrees. The best time to spray is early in the morning before 10:00 am on a calm day, with dew still present on the leaves. Overcast, foggy, or humid conditions can extend the spraying window beyond 10:00 am.
- Do not spray chemicals or other products while the Sonic Bloom® sound is playing. If you apply Sonic Bloom along with another product, apply Sonic Bloom first, using the Sonic Bloom sound as prescribed. After the Sonic Bloom sound has been turned off, apply the other product the next day.
- Do not combine other products with Sonic Bloom® Organic Nutrient Spray solution.
- Do not use the Sonic Bloom® sprayer to apply other products.
- Do not re-use existing solutions of Sonic Bloom® that have been mixed with water after one month. Instead, discard the solution by pouring it over the plant's roots.
- If the weather is extremely hot (above 92°F) and dry, do not play the sound between 10:00 am and 5:00 pm
- IF YOU ARE IN A DRY CLIMATE, OPERATING THE SB AUDIO BOX DURING FOGGY OR RAINY PERIODS CAN BE VERY BENEFICIAL.
- SONIC BLOOM® CAPS ~ Add One Sonic Bloom® Dissolvable Cap to 850 ml very warm water in a spray bottle (not provided). Play Music CD or Audio Box and wait at least 10 minutes, particularly in the early morning when dew is present. Shake the spray bottle until Sonic Bloom Spray is foaming. Spray plants thoroughly, especially under the leaf, and allow music or frequency to play One to Three hours. Rinse plants the day after or in the evening the day you Sonic Bloom Spray. Repeat spray & sound directions every 7-10 days for most plants.
- SONIC BLOOM® POWDER ~ Store in a cool, dry place with lid tightly sealed for maximum extended shelf life. Add one teaspoon (scoop provided) to 4 Liters of water. Shake well till foaming. Expose plants to sound, Music CD, or Audio Box 20 minutes before spraying thoroughly, especially under the leaf. Once mixed, Sonic Bloom® Spray is good for one month, then discard or pour into the soil. If growing Hydroponically or with Aquaponics, use very fine mist and do not add Sonic Bloom® spray to water.
- Allow sound exposure for 1-3 hours, particularly in the early morning, when dew is present on the plants' leaves.
- Repeat sound & spraying directions every 7-10 days for most plants.
- Vegetables every 7 to 10 days.
