- ✓ Operating for 22 years

Diseased plants and sick animals are the result of a failure to replace ALL the elements taken out during growing.

Seasonal Greeting ...

I am so confident that my products are harmless to human health and in fact beneficial to human, beast and planet, that I bathe in it...

SERIOUSLY, I DO BATHE IN MY PRODUCTS.

Is there anyone out there that would back their fertilisers and microbial inoculation products by bathing in it?

If it's good enough for me, it's good enough for your soils, plants and animals... Except the fish fertiliser; too many cats around that might chase after me!

It is the most ancient natural solution on Earth.

Its available to YOU, through AJ Products.

Try it for yourself and see the amazing results!
